Preface

In October 2024, the academic world converged in Xiamen, China to witness the grand opening of the 2024 5th International Conference on Computer Science and Management Technology (ICCSMT 2024). Hosted by Xiamen University and supported by numerous prestigious institutions and enterprises, this conference marked a significant milestone in the fusion of computer science and management technology.

The three-day event brought together over 300 experts, scholars, and industry professionals from more than 100 universities across the world. It served as a platform for sharing the latest research findings, exploring academic trends, broadening research horizons, and fostering collaborations aimed at the industrialization of academic achievements.

ICCSMT 2024 was structured meticulously to ensure an enriching and engaging experience for all participants. It opened with two opening remarks and four keynote speeches, each delivered by renowned experts in their respective fields. The keynote speeches covered a wide array of topics, from cross-border e-commerce management and robust optimization in uncertain environments to the application of artificial intelligence in education and medical technology. Professor Baozhuang Niu from South China University of Technology initiated the keynote sessions with his insightful presentation on channel conflicts, coordination, and resilience in cross-border e-commerce. Professor Zhenzhen Zhang from Tongji University then elaborated on path planning in uncertain environments, emphasizing the significance of robust optimization across various domains. Zhi Luo, Deputy General Manager of Tencent Cloud Education Industry, showcased Tencent's exploration in AI-powered educational solutions, while Chenyang Xu, President and Co-Chairman of PVmed, discussed the impact of generative AI on medical technology.

Following the keynote speeches, the special sessions delved into specific research areas such as large models and smart supply chains, and digital innovation. These sessions featured in-depth discussions and presentations by leading experts, fostering vibrant intellectual exchanges and collaborations. The conference also included oral presentations and poster sessions, where researchers from various institutions presented their latest findings, contributing to the advancement of computer science and management technology.

The proceedings of ICCSMT 2024 represents a compilation of the best papers presented at the conference, each undergoing rigorous peer review to ensure their academic merit. It serves as a testament to the endless possibilities that arise when minds come together to explore, innovate, and collaborate. We hope that the readers of this proceeding will find inspiration and guidance in these papers, and that they will contribute to the continued growth and development of computer science and management technology.

The significance of this conference lies not only in the dissemination of knowledge but also in its role as a catalyst for interdisciplinary collaboration and innovation. By bringing together experts from academia and industry, ICCSMT 2024 has fostered a dynamic environment where ideas can flourish and be translated into practical solutions. The conference has underscored the importance of integrating computer science and management technology to address contemporary challenges and drive progress in various sectors.
